Carbide gravers

PRODUCT NEWS

THE BEST CHOICE *for professionals*

A new range of Glardon® gravers made out of Tungsten Carbide. Its material, shape as well as its surfaces have been developed seeking a highly performant tool.

This brand new swiss made tool offers unique benefits, such as :

- **Extremely high wear resistance**

The Tungsten Carbide gives these new gravers an exceptional hardness of 1500 HV. With the right blend of hardness and toughness, they can be easily sharpened and remain incisal for an incredibly long time.

- **Increased service life**

Lower your spending with these long lasting gravers thanks to their reduced sharpening time and exceptional toughness that avoid breaking.

- **Productivity gain**

Suitable for any kind of power systems (high speed cutting).

- **High-gloss and well finished surface**

These tools can be used effectively on hard material as well as gold, silver, brass...

- **New design**

- More ergonomic
- Simplified Machine Fixation

- **Screw flat**

- **Various shapes available**
